

## TALK ON SHROUD TESTING

After the Annual General Meeting Ian Wilson spoke on "The 1978 Testing of the Shroud - What has it Achieved?". He said that after years of mystery surrounding the 1978 testing, most of what was carried out has now been published - and it is clear that there are many unsatisfactory features. He particularly criticised the STURP team for failing to include among their number anyone professionally engaged in the examination of archaeological or art objects.
